401 Grand Street, 7th Floor
Paterson, NJ 07505

Dear Todd C. Stanley, CPA:

LexisNexis Risk Solutions is the sole source provider of Accurint for Law Enforcement (Accurint), the most robust online investigative tool available. Accurint is a proprietary database system owned by LexisNexis Risk Solutions. Accurint anticipates intelligence needs with next-generation features and real-time access. Accurint offers over 91.3 billion public records gathered from more than 10,000 sources of data. No other commercially available service provides more public records.

Accurint provides an in-depth range of information that is critical to investigators. The associative links, historical residential information, and related data are more comprehensive than other commercially available database systems presently on the market. Our product platform offers many diverse applications and functionalities.

Using proprietary algorithms, compilation techniques and retrieval technology to access data stores containing billions of records, Accurint's ability to deliver high-quality matches and find-rates are unparalleled. Accurint's cutting-edge technology allows searches to be performed much more cost effectively than alternatives. Given a few pieces of information (e.g. a phonetically spelled name, the city of a previous address), Accurint can rapidly retrieve a complete and accurate identification of an individual, including current and historical addresses as well as associative links (relatives, associates, and neighbors).

Accurint allows users to choose the type of report required by offering a screen denoting several options that can be selected or de-selected, thus customizing a specific report. This report customization eliminates superfluous data that could waste a user's time during the investigation process.

Users can access our website 24 hours a day, 7 days a week, to perform instantaneous searches on virtually any individual in the U.S., providing detailed information such as current addresses and phone numbers, historical addresses and phone numbers, relatives, bankruptcies, property assessments, property deeds, corporate filings, and much more. In addition to the exceptional functionalities described above, Accurint has the following unique characteristics, setting it apart from other services:

- **Advanced Linking Technology** – Our proprietary linking technology, LexiD, securely and intelligently analyzes billions of partial and complete records, and then filters

and links that information based on relevance to provide a more complete picture of an individual. No other system can provide you this functionality.

- **Response Time** – Accurint query responses come back virtually instantly (within seconds) and Accurint reports are generated in seconds.
- **Timeliness of Data** – Data is updated as often as daily, depending upon the data source. Queries and reports are always run against the most current data.
- **Configurability** – Users can control the results included in reports, and preferences can be saved as a default setting.
- **User-Friendliness** – Based upon customer testimonials, Accurint is the easiest system on the market to use.

Sincerely,

A handwritten signature in blue ink, appearing to read "Suzanne Poulton".
